AUEB’s OPERATIONAL STRUCTURE

The structure and operation of the Institution is defined by current legislation as in force. The Athens University of Economics and Business is under the supervision of the Ministry of Education, Research and Religious Affairs. Its governing bodies include:

- a. The Governing Council
- b. The Senate
- c. The Rector
- d. The Vice-Rectors
- e. The Executive Director

Until the Governing Council assumes its duties, administration is exercised by the University’s Rector's Council

AUEB’s ACADEMIC STRUCTURE

The Athens University of Economics and Business is structured by academic units of two (2) levels: a) the Schools, and b) the Departments

Each School is structured by at least two (2) Departments, covers a domain of related scientific areas, and ensures the interdisciplinary approach to teaching and research between its departments. The School is responsible for supervising and coordinating the operation of the Departments and the educational and research work produced, in accordance with the Internal Operating Regulations.

The bodies of the School, according to Law 4957/2022 (A 141) as applicable are: a) the Dean and b) the Dean's Council

The Department is the University's fundamental academic unit and aims to advance a specific field of science, technology, letters and arts through education and research. The Department consists of all the members of the Teaching & Research Staff (DEP), the members of the Special Education Staff (EEP), the members of the Laboratory Teaching Staff (EDIP) and the members of the Special Technical Laboratory Staff (ETEP).

Bodies of the Department according to Law 4957/2022 (A 141) as applicable are: a) the Assembly, b) the Board of Directors, c) the Head/Chair and d) the Deputy Head/Chair.

The Athens University of Economics and Business consists of three Schools & eight Departments:

1. SCHOOL OF ECONOMIC SCIENCES

- Department of International and European Economic Studies
- Department of Economics.

2. SCHOOL OF BUSINESS

- Department of Management Science and Technology
- Department of Business Administration
- Department of Accounting and Finance
- Department of Marketing and Communication.

3. SCHOOL OF INFORMATION SCIENCE AND TECHNOLOGY

- Department of Informatics
- Department of Statistics

ADMINISTRATIVE BODIES OF POSTGRADUATE STUDY PROGRAMS

Competent bodies for the organization and operation of the Postgraduate Study Programs are:

- a) the Senate,
- b) the Assembly of the Department,
- c) the Coordinating Committee (CC), and
- d) the Director of the Postgraduate Program.

Especially for inter-departmental, inter-institutional and joint programs, the responsibilities of the Department's Assembly are exercised by the Curriculum Committee

UNIVERSITY STAFF

The University staff consists of the following categories:

➤ **TEACHING STAFF:**

- Teaching & Research Staff (DEP)
- Emeritus Professors
- Visiting Professors
- Special Education Staff (E.E.P.)
- Laboratory Teaching Staff (E.DI.P.)
- Special Technical Laboratory Staff (E.T.E.P.)
- Auxiliary Teaching Staff

- Teaching Fellows
- Scientific Faculty Members
- Adjunct Instructors
- Secondet Teachers

➤ **ADMINISTRATIVE STAFF**

SERVICES

The Athens University of Economics and Business provides both administrative and other services (meals, housing, library, sport facilities etc.) aiming at serving both its students and staff. More information on the organization and operation of the University's services can be found on the University's website (<http://www.aueb.gr/en>).

GENERAL DESCRIPTION OF THE UNIVERSITY

The Athens University of Economics and Business (AUEB), as a Higher Educational Institution, is a legal entity governed by public law and supervised by the Ministry of Education, Research and Religious Affairs.

AUEB is, in order of seniority, the third Higher Education Institution of the country and the first in the fields of Economics and Business Administration. Later, the scientific fields of Informatics and Statistics were added. Since its founding, in 1920, AUEB has a rich and noteworthy tradition of significant academic achievements that define the present and create excellent prospects for the future.

The University as a center of excellence, in academic research and teaching, is rated as one of the leading universities in its subject areas in Greece and one of the best internationally. The high level of its staff, the quality in teaching and research, the modern curriculum/courses, but also the high demand of its graduates significantly enhance the University's brand name and reputation, in Greece and abroad.

Detailed information on the study programs is provided in the study guides and departmental websites.

ADMISSION/REGISTRATION PROCEDURE

Chief Regulations of the University (including academic recognition procedures)

The regulations include, for example:

- The University's Internal Operating Regulations
- The Organization of Administrative Services
- The Regulations for the Operation of Postgraduate and Doctoral Study Programs
- The Internal Regulation for conducting postdoctoral research

AUEB'S ECTS COORDINATOR

The University's ECTS Coordinator is the Quality Assurance Chairperson, who ensures the University's compliance with the principles and rules of the European credit accumulation and transfer systems, supervises compliance and implementation and is responsible for the full recognition and transfer of credit units.

PART TWO: INFORMATION ABOUT THE MASTERS (M.Sc.) PROGRAM IN FINANCIAL MANAGEMENT

General description

The Master's program in Financial Management is a new postgraduate program, established in 2018 (M.D. 5584/ Governmental Gazette 3841/issue B'/6-9-2018 & M.D.2552 issue B'/1-06-2022 M.D. 2552 & M.D. 2656 issue B' 02-05-2024 as modified and currently in force) and is entirely taught in English. It mainly aims to attract international students as well as Greek students interested in attending a Master's program in English. The program flaunts this way an international profile, in line with the latest global economic and business developments, thus reinforcing AUEB and its graduates' skills for competing in the international marketplace. The program's curriculum is up to date and in line with the latest scientific developments, designed to offer high-quality specialized scientific knowledge in the field of Financial Management while focusing on current international trends in the area. Considering the unstable national and international economic conditions, as well as the high complexity of financial markets, specific knowledge in this field is now, more than ever, essential for climbing the executive ladder in any given industry.

Degree Awarded

The Postgraduate program in Financial Management leads to the award of **Master of Science (MSc) in Financial Management** with the following specializations:

- Financial Management
- Data Driven Financial Management

The graduates' specialization is indicated on the transcript of grades and on the diploma supplement and not on the Masters' degree awarded.

Admission Criteria

To be accepted into the Master's Programme, students are required, to have an undergraduate degree from a Greek Institution of Higher Education or an undergraduate degree from a foreign Institution of Higher Education which has been recognized by the Hellenic National Academic Recognition Information Center (NARIC – DOATAP), in accordance with the relevant provisions of Greek law (M.D 4957/2022 article 304).

The program admits up to forty (40) students to the full time program and up to forty (40) students to the part time program per year.

In the framework of AUEB's cooperation with major foreign higher education institutions (HEIs), the MSc in Financial Management may accept visiting students on top of the above mentioned 80 students that regularly get accepted. All incoming visiting students must meet the program's academic acceptance criteria and are registered by the registrar upon arrival at AUEB for a predesignated time period, while retaining their student status at their home institution. All incoming visiting students are expected to achieve a passing grade (at least 5/10) in the examinations of the courses selected to attend in order to be awarded the corresponding ECTS credits. Upon successful completion of the selected courses, they will

receive a transcript of records (ToR). Incoming visiting students may be requested to pay portion of the program's tuition fees, in accordance to the decisions of the Assembly of the Department of Accounting and Finance and the Memorandum of Understanding signed between AUEB and the cooperating foreign HEI.

Applicants' selection is made according to the provisions of the Law No. 4957/2022 and the provisions of the Program Operating Regulations as decided at the **17th General Assembly of the Department of Accounting and Finance, article 5.**

The Following documents must be submitted with the application, as indicated in the official call for applications:

1. Online application form https://e-graduate.applications.aueb.gr/?lang=en_US
2. Curriculum Vitae
3. A copy of the undergraduate degree and a transcript of classes (of a Greek Institution of Higher Education or a foreign Institution recognised by Hellenic National Academic Recognition Information Center- NARIC). Students of Higher Education Students in their final year of undergraduate studies must submit a statement (in accordance with Greek law 1599/86) that their acceptance into the Program is contingent upon them having obtained their degree by the end of the upcoming September exam period.
4. Certification of excellent or very good knowledge of the English language (at the C2 or C1 level). Students who do not have such certification when they submit their application must submit a statement (in accordance with Greek law 1599/86) that their acceptance into the Programme is contingent upon them acquiring the required certification of knowledge of English.
5. Two letters of recommendation from professors (for candidates for full-time studies) and/or employers (for candidates for part-time studies).
6. Verification of work experience (for candidates for part-time studies)
7. Applicants holding a non-Greek university degree must meet the requirements set by law 4957/2022 (art. 304) regarding their degree's recognition by the Hellenic National Academic Recognition Information Centre (DOATAP).

The applicant's evaluation process is as follows:

- a. The Admissions Committee Compiles a table of all applicants
- b. Rejects all applicants that do not meet the minimum prerequisites that have been set by the Departmental Assembly. (e.g minimum bachelor's degree, or GMAT, etc)
- c. Calls all eligible applicants for a personal interview with at least two members of the Admissions Committee.
- d. Ranks all applicants according to the above mentioned quantitative and qualitative criteria and selects the ones that will be accepted.

The final list of accepted applicants is validated by the Departmental Assembly.

In addition, all accepted candidates are required to attend and pass an exam in four (4) preparatory courses prior to their final registration to the Program, unless exempted by the Departmental Assembly. The preparatory courses are offered in September. Accepted applicants must achieve passing grades to all preparatory courses in order to make their final registration to the program, otherwise they receive a refund of tuition fees already paid, if any.

Learning Outcomes of the Program

Upon successful completion of his/her studies, the program's graduate is expected to have developed comprehensive and specialized knowledge on the core concepts and the most recent trends in Financial Management. He/She is expected to demonstrate an understanding of and to be able to analyze the fundamental rules and processes of financial reporting, the functioning of financial institutions and money and capital markets. The graduate is also expected to be able to analyze specialized topics in key thematic areas for an investment professional, i.e., fundamental analysis of equities, financing decisions, mergers and acquisitions, investment banking, fraud detection, derivatives valuation, financial planning, and taxation. Furthermore, the program's graduate will be able to apply, analyze and synthesize financial information, to evaluate managerial performance, the financial position, credit capacity, short and long-term survival, and growth prospects of firms, as well as to conduct a full-scale business valuation exercise. Moreover, the graduate is expected to have strong analytical and critical skills, and will be able to use information technology, statistical and financial analysis tools, in order to competently follow the rapidly changing academic and empirical developments in the field of Financial Management, at the national and international levels. As financial markets have nowadays reached a very high degree of complexity, the MSc graduates will be in position to constructively apply sophisticated and academically rigorous concepts, in order to adapt to the constantly changing needs of a successful career in Financial Management.

Access to further studies

Graduates of the Programme can continue their studies at the Doctoral Level (3rd cycle of studies).

Program Structure Chart with Academic Credits (ECTS)

The Program Offers:

- A full time course of 12-month duration
- A part time course of 24-month duration

Students in both courses can specialize in:

- Financial Management
- Data Driven Financial Management

The Master's Program in Financial Management corresponds to **seventy five (75) ECTS** credits (European Credit Transfer and Accumulation System), and consists of **twelve (12) courses**, worth five (5) ECTS credits each, **as well as the MSc thesis or an internship in a related subject**, worth fifteen (15) ECTS credits. For part-time students, eight (8) courses are offered in the first year of studies and four (4) in the second year, while classes are held during evening hours. Lectures are conducted in English and the literature is exclusively in English. Furthermore, the program includes four (4) preparatory courses, that take place in

September each year. Exemptions from the preparatory courses may be allowed at the discretion of the Departmental Assembly. **A student who fails any of the preparatory courses is not admitted to the Program.**

For part-time students, the seminar takes place during the third semester. Successful completion of the seminar is a prerequisite for the initiation of the dissertation

**15
ΠΜ/ECTS**

Final Assessment

The final assessment of each course is based either on written or oral examinations and/or assignments. The final grade for each course is determined by the instructor and may include individual and/or team project assignments in addition to the final exam. Participation in the designated (according to the official timetable) date of examinations is mandatory.

Exam Regulations and Grading Scale

- The examinations grading scale is set from zero (0) to ten (10), half grades are also awarded. The passing grade is five (5) or higher.
- Unexcused absence from a final examination is equivalent to failure in the course
- A student who fails a course is re-examined in the following examinations' period, in which case his or her final grade in the course is subject to a penalty, in accordance to the following formula: $\text{final grade} = (\text{exam grade} - 5) * 0.5 + 5$. In case a student fails a course twice, that is both in the initial examination as well as the re-examination, his failure is then considered final. In such a case the student is obliged to **a temporary pause of studies** for the current academic year, and he/she is re-enrolled in the Master's program during the next academic year, starting with the attendance of the course he/she had failed twice. **During the temporary pause of studies, student status is suspended.** The pause of studies periods are counted towards the maximum time allowed to complete the studies as defined in article 7 paragraph 2 hereof.
- Students are not allowed to fail more than two courses per semester of studies (failures due to unexcused absence in the final exams also count).
- In order to be awarded the Master's degree, students must achieve passing grades in all courses as well as the Master's dissertation/work placement in the designated time period, as defined in article 7 paragraph 2 hereof. If not, then students are dropped from the program, and are only entitled to a certificate for courses successfully attended.

Upon the Administrative Committee's proposition, the Departmental Assembly may decide to delist a student from the program if he/she:

- a. fails three (3) or more courses per semester of studies (this stands for final failure as defined above).
- b. fails to complete his/her studies in the maximum time allowed to complete the studies according to the program's Academic Regulations
- c. fails to meet his/her financial obligations to the program.
- d. fails into plagiarism, inappropriate behavior or cheating of any kind.

In case of a student's drop, tuition fees already paid are not refunded unless otherwise decided by the Departmental Assembly.

Research Laboratories of the Department

The Laboratories' mission is to:

- cover the teaching and research needs of the Department, at both undergraduate and graduate level, as well as to serve the teaching and research needs of other departments of AUEB
- cultivate cooperation with other research centers and academic institutions in Greece and abroad, promoting this way teamwork and reciprocity
- organize scientific lectures, seminars, symposia, conferences and other events, publish scientific papers, and invite Greek and foreign renowned scientists and other acclaimed individuals.

Laboratory of Accounting Applications (AISLab)

Chairman: Professor D. Hevas

Scientific Subject: The laboratory relies on Information Technology systems to cover teaching and research needs in the following fields: a) analysis of accounting information systems b) simulation of the operation of the accounting cycle of commercial, industrial, and services sector companies c) information management in decision making processes (both in terms of the internal as well as the external business environment) and d) simulation of the impact of decisions taken.

Location: A 33, 3rd Floor, Antoniadou Wing, Main Building, 76 Patission Str.

Website: <http://www2.aislab.aueb.gr/>

Laboratory of Applied Finance (FinLab)

Chairman: Professor K. Drakos

Scientific Subject: The laboratory covers teaching and research needs in the fields of: a) analysis and operation of money and capital markets, b) analysis of accounting and financial information for investment decisions, c) simulation of the investment behavior of the agents operating within the framework a stock market and d) simulation of the optimization decisions for a portfolio of primary securities or their derivatives.

Location: 108, 1st Floor, Building of 47A Evelpidon Str. & Lefkados

Website: <https://www.dept.aueb.gr/en/FinLab>

Business Analysis and Valuation Laboratory

Chairman: Professor A. Ballas

Scientific Subject: The laboratory serves teaching and research needs in the fields of: "Financial Analysis and Business Evaluation", "Fraud Examination", "Auditing" and "Tax Accounting".

Location: 206, 2nd Floor, Building of Troias Street

Behavioral Finance Laboratory (BeFin)

Chairman: Professor S. Spyrou

Scientific Subject: The laboratory serves research and teaching needs in the field of "Capital Markets, Money Markets and Investment Behavior" and in particular, on topics related to behavioral finance. Specifically, the scientific subjects of the laboratory include: Prospect Theory & Rationality, Investor Psychology & Heuristics, Predictions & Framing Effects, Herd Behavior, Investor Sentiment, Closed End Fund Puzzle and Dividend Puzzle, Investor Overreaction & Underreaction, the Limits of Arbitrage, Asset Pricing Models and Behavioral Variables, Monetary Policy and Effect on Expectations.

Location: 207, 2nd Floor, Building of Troias Street

Website: <https://befinlab.aueb.wixsite.com/befinlab>

International Shipping, Finance and Management Laboratory (interdepartmental)

Participating Departments:

Department of Accounting and Finance (**Presiding** –School of Business)

Department of Management Science and Technology (School of Business)

Department of International and European Economic Studies (School of Economics)

Chairman: Professor M. Kavussanos

Scientific Subject: The laboratory serves research and teaching needs in the scientific areas of Shipping markets (freight, newbuilding, sale and purchase, demolition, bunker, energy and other markets); Maritime and Port Economics; Shipping Freight Derivatives and Risk Management; Investments and Financial Management; Alternative Sources of Ship Financing; Shipbuilding Finance; Debt Financing; Public and Private Equity markets; Structured Finance; Maritime investment appraisal and budgeting; Financial analysis and modelling of Shipping Investments; Corporate Governance and other topics related to Finance and Management in Shipping and other sectors of the economy.

Location: 207, 2nd Floor, Building of Troias Street

Website: <https://www.dept.aueb.gr/en/isfm>

Personnel of the MSc in Financial Management

The faculty of the MSc in Financial Management consists of Professors, Associate Professors, and Assistant Professors with a rich scientific work, significant number of publications in reputable scientific journals, and working experience in foreign and Greek institutions. The program also employs members of administrative staff.

Director: Professor Georgia Siougle

Members of the Administrative Committee: Professor Apostolos Ballas, Associate Professors Georgios Leledakis and Georgios Chalamandaris and Assistant Professor Leonidas Rompolis

Professors

Ballas Apostolos, Ph.D. University of London

Drakos Konstantinos, Ph.D. University of Essex

Georgoutsos Dimitrios, Ph.D. University of Essex

Kavussanos Emmanouil, Ph.D. City University

Papadaki Afroditi, Ph.D. Athens University of Economics and Business

Spyrou Spyridon, Ph.D. Brunel University

Siougle Georgia, Ph.D. Athens University of Economics and Business

Hevas Dimosthenis, Ph.D. University of Wales

Associate Professors

Doukakis Leonidas, Ph.D. Athens University of Economics and Business

Episkopos Athanasios, Ph.D. State University of New York

Leledakis Georgios, Ph.D. University of Warwick

Staikouras Christos, Ph.D. City University (in suspension of duties)

Tsekrekos Andrianos, Ph.D. Lancaster University

Tsouknidis Dimitrios, Ph.D. Athens University of Economics and Business

Chalamandaris Georgios, Ph.D. Imperial College London

Assistant Professors

Chalevas Konstantinos, Ph.D Athens University of Economics and Business

Demirakos Efthimios, Ph.D. Manchester Business School

Karampinis Nikolaos, Ph.D. Athens University of Economics and Business

Karatzimas Sotirios, Ph.D. Athens University of Economics and Business

Bekiros Stelios, Ph.D. Athens University of Economics and Business

Rompolis Leonidas, Ph.D. Athens University of Economics and Business
Sakkas Athanasios, Ph.D. Athens University of Economics and Business
Tzovas Christos, Ph.D. Dundee University
Vlismas Orestis, Ph.D. Athens University of Economics and Business

Administrative staff of the Department's Postgraduate Programs

Alexandri Chara, MSc
Choli Kassiani, MSc
Theologou Maria, MSc

Job placement

Graduates of the program benefit from the excellent relations that the Department of Accounting and Finance has built over the twenty-five years of its existence with firms in the financial sector. Students graduate well equipped to seek employment and follow successful careers in the private and public sector either in Greece or abroad. It is expected that the program's graduates will be recruited by companies and organizations, such as commercial and investment banks, financial institutions, brokerage firms, consulting firms, insurance companies, real estate agencies and shipping firms.

Tuition fees

The program's tuition fees come up to 6.200€ for the full time program and 6.400€ for the part time program. The tuition fees are paid in several installments. Students may be exempt from tuition fees according to the provisions of the Law No. 4957/2022, article 86.

International Accreditations of the Program

The M.Sc. in Financial Management has been accepted into the **CFA Affiliated Program**. Through this recognition, the international organization **CFA® (Chartered Financial Analysts)** certifies that the Master's programme offers a curriculum which is consistent with the requirements of the Institute for the acquisition of the internationally-established professional title which is awarded by the **CFA® Institute**. As such, the Master's Programme is eligible to award up to **two scholarships per academic year** within the framework of the CFA Program Awareness Scholarships, to students who wish to take the exam to earn the professional certification from the CFA. Scholarships take the form of partial exemption from the examination fees for the certification.

The professional title awarded by the **CFA® Institute** has been recognized by the Hellenic Capital Market Committee and the Athens Stock Exchange and entitles the titleholders to exemption from the corresponding exams that are held in Greece. In the private sector, possession of this title from the **CFA® Institute** carries special weight and is an important qualification for all those who work or wish to work in investment, banking and, more generally, in the wider financial sector. Students of the M.Sc. in Financial Management, in addition to the thorough academic training received in the subjects that are included in the curriculum, are well prepared to attain a highly prestigious professional certification, thus acquiring a significant advantage in the job market.

Description of Individual Courses

Full Time and Part time program

Course title	Accounting for Corporations I			
Course code	bm73103f bm73103p			
Type of course	Compulsory			
Level of course	Postgraduate			
Year of study	1 st			
Semester/trimester	1 st			
Number of credits allocated	5			
Name of lecturer	Ballas Apostolos, Professor, Dept of Accounting and Finance			
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>After successfully completing the course, students will:</p> <ol style="list-style-type: none"> 1. Be familiar with published financial statements, their format and comprehend the jargon that is found in them. 2. Understand the conceptual framework and, to a limited extent, the limitations enshrined in law which determine how accounting is carried out in organizations. 3. Understand the basic rules for the preparation of financial statements and apply them in basic reporting situations. 4. Be able to use these statements in making basic decisions about an organization and evaluating its performance. 5. Be ready to take further coursework in accounting and related fields. 			
Prerequisites	NONE			
Course contents	<p>Accounting for Corporations I is the first course about accounting to a firm's external constituencies for people who intend to become managers. It will also be of interest to anyone who wants to be able to assess a company's performance.</p> <p>During the course we will focus on how financial accounting systems work. Among the topics to be covered are the financial statements, and how are assets, liabilities and equity measured and reported.</p> <p>Accounting for Corporations I may be the first course in accounting for most of you. For this reason, the two basic objectives of the course are:</p> <ol style="list-style-type: none"> 1. To make clear the way in which accounting is an information development and communication function. 2. To prepare you to obtain additional knowledge and to facilitate subsequent learning. 			
	LECTUR	TOPIC	READ	PROBLEMS
	E			
	1	The Financial Statements	1	P1-1, P1-3
	2	The Accounting System	2	P2-1, P2-2, P2-3, P2-4

	<p>3 The Recording Process: Transactions 3 Analysis P3-2, P3-6, P3-7 & COMP3-1</p> <p>4 The Recording Process: Adjusting 4 Entries P4-2, P4-4, P4-6, P4-7</p> <p>5 Revenue Measurement 6 Monetary Assets P6-3, CON6-1, CP6-4, CP6-5</p> <p>6 Inventory Valuation and the 7 Measurement of the Cost of Goods Sold P7-1, CP7-4, CP7-5, CON7-1</p> <p>7 The Valuation of Long-lived Assets 8 CP8-4, CP8-5, CP8-8, CON8-1</p> <p>8 Sources of Capital: Short – Term 9 Liabilities P9-6, P9-7, P9-8, CC9-1</p>
Recommended reading	<p>1. Main Textbook: Libby, R., Libby, P. A., & F. Hodge. (2020). Financial Accounting. McGraw-Hill, 10th ed. (Global edition)</p> <p>2. Additional readings will be handed out in class or posted at the portal. You are allowed and encouraged to help each other with the homework and class preparation.</p>
Teaching methods	Lectures, Study and Analysis of Bibliography
Assessment methods	<p>1) Three (3) on-line weekly quizzes on Sunday afternoons which will count for 30% of your final grade</p> <p>2) A final exam, counting for 70% of your grade.</p> <p>The exam will be closed book, although you will be allowed to bring in an A4 page of HANDWRITTEN notes in the exam room. However, programmable calculators or mobile phones will not be allowed for use during exams. The final exam will assess student’s ability to use the financial statements and related information in making basic decisions about an organization and evaluating its performance.</p>
Language of instruction	English

Course title	Financial Management
Course code	bm73101f bm73101p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	1 st
Number of credits allocated	5
Name of lecturer	Kavussanos Manolis, Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>At the end of the course unit students will be able to:</p> <ul style="list-style-type: none"> • <i>understand the time value of money and solve associated financial problems</i> • <i>select appropriate criteria to evaluate investments and choose between them</i> • <i>price bonds and shares from various financial models</i> • <i>understand free cash flows and their components generated by</i>

	<p><i>investments</i></p> <ul style="list-style-type: none"> • <i>calculate the cost of capital overall and from different sources</i> <p>Understand the different objectives between shareholders and management and the problems that arise when they are separate</p>
Prerequisites	NONE
Course contents	<p>The following topics are covered in the course unit</p> <ol style="list-style-type: none"> 1. <i>The Business and Financial Environment of Companies</i> <ul style="list-style-type: none"> • <i>Aims and Objectives of Financial Management</i> • <i>Meaning of Financial Decisions</i> • <i>The economic environment of companies</i> 2. <i>Time Value of Money</i> <ul style="list-style-type: none"> • <i>Future Value, Present Value, Internal Rate of Return, Payback period, Applications</i> 3. <i>Bonds and Shares</i> <ul style="list-style-type: none"> • <i>Pricing Models, Applications</i> 4. <i>Investment Appraisal Methods</i> <ul style="list-style-type: none"> • <i>'Non Rational' Criteria: Recovery of Principal (Payback Period) & Accounting Rate of Return (ARR)</i> • <i>'Rational' Criteria: Net Present Value – NPV, Economic Value Added (EVA), Internal Rate of Return- IRR</i> 5. <i>Net (Free) Cash Flow Analysis (NCF)</i> <ul style="list-style-type: none"> • <i>Net Cash Flows before taxes and after taxes</i> 6. <i>Risk and Investment Appraisal</i> <ul style="list-style-type: none"> • <i>Definition & Measures of Risk</i> • <i>Incorporating Risk in Investment Appraisal</i> 7. <i>Investment Appraisal in inflationary periods</i> <ul style="list-style-type: none"> • <i>Investment appraisal in nominal terms and in real terms</i> • <i>Applications</i> 8. <i>Cost of Capital and Market Efficiency</i> <ul style="list-style-type: none"> • <i>Cost of Equity Capital, Cost of Debt, Weighted Average Cost of Capital</i> • <i>Capital Markets and the Pricing of Risk</i> • <i>Capital Asset Pricing Model</i>
Recommended reading	<p>- Suggested bibliography:</p> <ul style="list-style-type: none"> • <i>Berk, J. and DeMarzo, P., 'Corporate Finance', Pearson International.</i> • <i>Berk, J., DeMarzo, P. and Harford, J., 'Fundamentals of Corporate Finance', Pearson International.</i> • <i>Brealey, R., Myers, S. and Allen, F., 'Corporate Finance', McGraw Hill International.</i> • <i>Brigham, E.F. and Ehrhardt M.C., 'Financial Management, Theory and Practice', South-Western Thomson Learning.</i> • <i>Copeland, T., Weston F. and Shastri K., 'Financial Theory and Corporate Policy', Pearson.</i> • <i>Damodaran, A., 'Applied Corporate Finance', Wiley.</i> • <i>Brealey, R., Myers, S. and Allen, F., 'Corporate Finance', McGraw Hill International.</i> • <i>Ross, S.A., R.W. Teaching methods	Lectures, Study and analysis of bibliography, Interactive Teaching
Assessment methods	Evaluation takes place through examination (100%)
Language of instruction	English

Course title	Econometric Methods
Course code	bm73102f bm73102p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st and 2 nd
Semester/trimester	1 st and 3 rd
Number of credits allocated	5
Name of lecturer	Drakos Konstantinos, Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The students will be able to apply the appropriate econometric estimation techniques for each type of dataset, and therefore learn model building skills. In addition, they will be able to extract information from data and explain agent behaviors, with the aim to setup forecasting models.
Prerequisites	NONE
Course contents	<ul style="list-style-type: none"> • Review of main statistical concepts and types of economic/financial data by variation source (cross-sectional, time series, panel). • Linear Regression with one Regressor, Ordinary Least Squares Principle, Interpretation of regression output, fitted values, residuals, measures of fit, hypothesis tests and confidence intervals. • Multiple Regression, interpretation of regression output, measures of fit, multicollinearity, dummy variable trap, Joint hypotheses tests on multiple coefficients, Other types of hypotheses involving multiple coefficients. • Nonlinear functions of one variable (polynomials, logarithmic transformations), interaction effects between independent variables (continuous/continuous, binary/binary, continuous/binary, binary/continuous). • Time series data, terminology and fundamental properties, basic data generation processes (AR, MA, ARMA), deterministic trends, seasonality, regression with time series, residual diagnostic testing (serial correlation: Durbin-Watson test, LM test, time-varying variance: LM tests), Granger Causality.

	<ul style="list-style-type: none"> • Introduction to Non-stationarity and Cointegration.
Recommended reading	Suggested bibliography: C. Brooks, 2019, Econometrics for Finance, Cambridge University Press
Teaching methods	Lectures, Study and analysis of bibliography, Interactive Teaching
Assessment methods	Evaluation takes place through examination (100%)
Language of instruction	English

Course title	International Finance
Course code	bm73104f bm73104p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st & 2 nd
Semester/trimester	1 st & 3 rd
Number of credits allocated	5
Name of lecturer	Georgoutsos Dimitrios, Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>Students after completing this course should be familiar with:</p> <ol style="list-style-type: none"> 1. Knowledge of the basic characteristics of the Foreign exchange market; basic strategies which are based on arbitrage techniques in the spot and forward markets; basic hedging strategies 2. Knowledge of the basic determinants of spot exchange rates; understanding of the advantages / disadvantages of fixed and floating exchange rates; analyzing macroeconomic policies under different exchange rate regimes 3. Analyzing international portfolio selection policies 4. Analyzing basic multinational companies corporate strategies and their project evaluation criteria
Prerequisites	NONE
Course contents	<ol style="list-style-type: none"> 1) Foreign currency markets. Structure, transactions and Spot and Forward rates. Arbitrage strategies. 2) Parity condition in international markets. Arbitrage strategies. 3) Foreign Exchange Derivatives: FX Futures and FX options 4) Balance of Payments issues. The architecture of the international Financial System 5) International Capital Markets: Fixed Income Securities and stocks. The Euromoney and Eurobond markets. 6) International Portfolio Investment 7) International Cost of Capital and International Capital Budgeting
Recommended reading	<p>Recommended reading:</p> <ol style="list-style-type: none"> 1) Shapiro, A, Moles, P., 2014. Multinational Financial Management, J. Wiley& Sons. 2) Levi, M., 2009. International Finance, Routledge, London. 3) Bekaert, G, Hodrick, R., 2012, International Financial Management, Pearson. 4) Solnik, B., McLeavey, D. 2004, International Investments, Pearson
Teaching methods	Lectures
Assessment methods	The evaluation is based on the final exams (weight 100%). The exams consist of two parts. The 1st consists of multiple choice

	questions while the 2nd is a problem solving section.
Language of instruction	English

Course title	Accounting for Corporations 2
Course code	bm73106f bm73106p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	1 st
Number of credits allocated	5
Name of lecturer	Karatzimas Sotirios, Assistant Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	After successfully completing this course, students will be able to: (1) Comprehend a firm's Equity and perform Equity transactions. (2) Comprehend a firm's Liabilities and perform Liability transactions. (3) Comprehend and prepare the Statement of Cash Flows. (4) Recognize the differences between operating, investing and financing activities.
Prerequisites	NONE
Course contents	(1) Liabilities (2) Equity (3) Types of dilutive securities and earnings per share (4) Statement of cash flows
Recommended reading	- Suggested bibliography: 1. Kieso, D.E., Weygandt, J.J., & Warfield, T.D. Intermediate Accounting: IFRS Edition, 2nd Edition, Wiley - Related academic journals: 1. The Accounting Review 2. Accounting Forum 3. Abacus
Teaching methods	Lectures, Interactive teaching, essay writing, project
Assessment methods	Language of evaluation: English Method of evaluation: 80% of the final grade from the final written exam, 20% from the project. All relevant information is available at the course's page in eclass.
Language of instruction	English

Course title	Corporate Finance with Analytics
Course code	bm73118f bm73118p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	1 st
Number of credits allocated	5
Name of lecturer	Leledakis Georgios, Associate Professor, Dept of Accounting and Finance

<p>Objective of the course (preferably expressed in terms of learning outcomes and competences)</p>	<p>Students having successfully attended the course should be able to:</p> <ul style="list-style-type: none"> • Use machine learning effectively and understand how the underlying algorithms work. • Use Python so that large data sets can be easily handled and use libraries such as Pandas, Numpy, Matplotlib, Scikit-Learn, and Eventstudy. • Understand the computation of financial event study analyses. • Perform an event study analysis on a single event or on an aggregate of events. • Discuss the patterns of corporate financing. • Explain the mechanisms used for factoring. • Define and explain the activities of venture capitalists. • Discuss differences between business angels and venture capitalists. • Identify and explain the organization structure of venture capital. • Describe the patterns of venture capital investment. • Calculate the cost of capital for venture capital. • Explain the design of convertible bonds. • Estimate the value of convertible bonds. • Review the most prominent theories of convertible debt financing. • Define, compare, and contrast the types of leases. • Identify the reasons for leasing and the reasons for not leasing. • Calculate the net advantage of leasing and related issues. • Discuss the important differences of the leasing around the world. • Categorize merger and acquisitions (M&A) activities based on forms of integration and types of mergers. • Explain the common motivations behind M&A activity. • Calculate the estimated post merger value of an acquirer, and calculate the gains accrued to the target shareholders versus the acquirer shareholders. • Distinguish and describe pre-offer and post-offer takeover defense mechanisms. • Explain the mechanisms used to convert on-balance-sheet assets to a securitized asset. • Describe the key parties involved in a securitization and their roles. • Illustrate the major forms of asset securitization. • Understand the prepayment risk on pass-through securities.
<p>Prerequisites</p>	<p>NONE</p>
<p>Course contents</p>	<ul style="list-style-type: none"> • An Overview of Corporate Financing • Factoring • Venture Capital • Convertible Bonds • Leasing (Operating and Financial Leases) • Mergers & Acquisitions • Securitization • Machine Learning Techniques and their application in corporate finance <p>Event Studies</p>

Course title	Machine-learning methods for Finance
Course code	bm73119f bm73119p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	1 st
Number of credits allocated	5

Name of lecturer	Chalamandaris George, Associate Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The course is an introduction to machine learning techniques. Upon completion of the course, students will be able to understand machine-learning techniques and implement applications to solve financial problems, using the appropriate Python libraries.
Prerequisites	NONE
Course contents	<ul style="list-style-type: none"> • Classification techniques <ul style="list-style-type: none"> ○ K-means, ○ Support Vector Machine, ○ naive Bayes classifier, ○ random forests • Methods of generalized regression <ul style="list-style-type: none"> ○ Ridge ○ LASSO ○ LARS). • Types of neural networks <ul style="list-style-type: none"> ○ Multilayer Perceptrons, ○ Convolutional NNs, ○ Recurrent NNs, ○ Self-Organized Maps, ○ Kernel Networks • Characteristic applications <ul style="list-style-type: none"> ○ credit-scoring ○ algorithmic trading ○ portfolio management ○ fraud detection • The distinction between supervised, unsupervised and reinforced learning • Python libraries (Tensorflow, Keras).

Teaching methods	Lectures
Assessment methods	<p>The evaluation of the course is conducted via a written examination (70%) and a compulsory project (30%). The project is a case study on machine-learning applications on financial data. The project is designed to test students on their programming, problem-solving abilities and on their reporting/submitting written work, backed up by computations/estimations.</p> <p>The written examination is a combination of multiple-choice questions, open-ended questions and problems to be solved.</p> <p>The evaluation criteria are communicated to the students in the first lecture and are also available online at the course's eclass page.</p>
Language of instruction	English

Course title	Investment Management
Course code	bm73107f bm73107p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	2 nd
Number of credits allocated	5
Name of lecturer	Sakkas Athanasios, Assistant Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>Upon completion of this course the students will:</p> <ul style="list-style-type: none"> • be able to measure and assess the risk and return of a portfolio of assets and understand how risk affects the valuation of assets in equilibrium. • have an understanding of the fundamentals of equity securities and the main issues in equity portfolio management strategies. • have an understanding of the fundamentals of fixed income securities and the main issues in bond portfolio management strategies. • be familiar with the latest findings of academic and practitioners research on investment strategies, the predictability of asset returns and the contribution of behavioural finance in understanding investor behaviour. • be able to independently analyse security markets, understand the available evidence and use it to make investment decisions. • have an understanding of the professional asset management industry and the main methods of evaluating portfolio performance.
Prerequisites	Accounting for Corporations I
Course contents	The objective of this course is to introduce the student in the theory and practice of investment management. In particular the focus of the course will be on the application of modern financial theory principles to understand practical portfolio selection and the pricing of assets in the capital markets. Topics will include portfolio selection, asset allocation, single and multi-factor risk models, the predictability of asset returns, investment strategies, active vs. passive investment strategies and alternative investments.

Course title	Accounting Measurement of Financial Instruments (IFRS 9)
Course code	bm73108f bm73108p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	2 nd
Number of credits allocated	5
Name of lecturer	Siougle Georgia, Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	This course intends to cover fundamental issues related to accounting treatments for financial instruments and the disclosure requirements for financial instruments. It covers the fundamental differences between equity and financial liabilities, financial assets, and accounting for hedging transactions. Also looks at the characteristics of basic financial instruments and complex financial instruments. Furthermore, addresses issues related to fair value accounting, revenue recognition and accounting for leases. Finally, discusses the underlying conceptual framework. Relevant research papers will be analyzed throughout the course.
Prerequisites	NONE
Course contents	Topics that are covered: IFRS Conceptual Framework <ul style="list-style-type: none"> • Fair Value Accounting • Classification of Financial Assets and Financial Liabilities • Measurement at initial recognition and subsequent reporting dates • Reclassification/ Derecognition of financial assets • Hedge Accounting • Derivative accounting • Financial Instruments: Disclosures • Revenue Recognition • Accounting for Leases
Recommended reading	Intermediate Accounting : IFRS Edition (3rd edition) Kieso, Weygandt, Warfield Interpretation and Application of IFRS, Wiley Students are also provided with lecture slides, case studies, research articles. All this material is available on the eclass platform

Course title	Fundamental Analysis of Investments
Course code	bm73109f

	bm73109p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st & 2 nd
Semester/trimester	2 nd & 4 th
Number of credits allocated	5
Name of lecturer	Doukakis Leonidas, Associate Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>Upon completion of the course, students will be able to:</p> <ol style="list-style-type: none"> 1. Develop a framework for analyzing a business that can be used as a basis for the preparation of a financial analyst report. 2. Calculate and interpret financial ratios (e.g. profitability, growth, leverage, and liquidity) that allow for across- and within- firm comparisons with the ultimate objective of forecasting the future. 3. Develop an understanding on how accounting errors (either intentional manipulation by the management or unintentional mistakes) and the flexibility that companies have in applying existing accounting principles affect reported income and the book value of equity. 4. Examine and compare different models of shareholder value including the residual earnings and the abnormal earnings growth model.
Prerequisites	NONE
Course contents	<p>The principal objective of this course is to develop students' capabilities to efficiently and effectively read, interpret and analyze financial statements. This is a course on fundamental analysis and has a very practical emphasis based on a series of class exercises and cases involving listed companies. Although the primary focus is on equity valuation, lending and other investment decisions are also discussed. Students learn how measurement and reporting rules determine and possibly restrain the information implied in accounting data and how reformulation and adjustments to the financial statements allow for better informed decisions.</p>

Course title	Accounting for Corporations II with Analytics
Course code	bm73120f bm73120p
Type of course	Compulsory
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	2 nd
Number of credits allocated	5
Name of lecturer	Doukakis Leonidas, Associate Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The course aims to help students develop a strong foundational understanding of financial accounting concepts, methods, and uses. It places a great emphasis on critically analyzing, interpreting, and evaluating corporate financial statements and related disclosures. The students will appreciate how different accounting rules, financial reporting choices and the use of estimates and judgment affect financial statements. The course has a practical orientation and employs “real world” financial statements to apply the knowledge gained from the application of accounting rules.
Prerequisites	NONE
Course contents	Accounting for Corporations II with analytics builds on and extends the contents of Accounting for Corporations I. The main topics in this course are: 1. Equity 2. Statement of Cash Flows 3. Leasing 4. Basic Cost Accounting Concepts and Break-even analysis Part of the contents of the course will be based on the use of Power BI.

Teaching methods	Lectures, Assignment, independent studying
Assessment methods	<p>At the end of the course, students sit an overall written exam. The exam consists of multiple-choice questions, short-answer questions, and problem-solving exercises.</p> <p>In addition, students have to deliver a team assignment about a topic relevant to OECD international taxation project.</p> <p>The overall grade is determined by the following formula: $80\% \times \text{Exam Grade} + 20\% \times \text{Assignment Grade}$</p> <p>Note: a student is required to receive at least 50% of the corresponding total marks of the exam and the assignment to pass the course.</p>
Language of instruction	English

Course title	Financial Data Analytics, Risk management & innovation
Course code	bm73223f bm73223p
Type of course	Elective
Level of course	Postgraduate
Year of study	1 st & 2 nd
Semester/trimester	2 nd & 4 th
Number of credits allocated	5
Name of lecturer	Rombolis Leonidas, Assistant Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>Upon successful completion of the course the student:</p> <ul style="list-style-type: none"> • can implement a program in Python and use its libraries to analyze financial data, create and evaluate algorithmic strategies. • will be able to value bond portfolios, extract the term structure of interest rates and implement investment strategies with fixed income securities. • will also be able to calculate the exposure of fixed income portfolios to interest rate and credit risk. • will be able to build optimal investment portfolios and evaluate their performance in relation to the risk they take. • will be able to price and hedge standardized and exotic derivative products. • can implement the basic risk management tools using Python.
Prerequisites	NONE
Course contents	The aim of the course is to provide students with the necessary tools and skills to use Python, and its specialized libraries, in solving financial computational problems. The course teaches how to write a program in Python starting with simple algebraic calculations to more sophisticated

	tools and libraries. The course covers a wide range of financial applications such as the analysis and processing of financial data, the creation of algorithmic strategies, the valuation and hedging of a bond portfolio, portfolio optimization, the evaluation of investment strategies, and the pricing and hedging of derivative products.
Recommended reading	- Suggested bibliography: <ul style="list-style-type: none"> • Hilpisch, Y., Python for Finance: Mastering Data-Driven Finance, O' Reilly, 2018. • Hilpisch, Y., Derivatives Analytics with Python, John Wiley & Sons Ltd, 2015. - Related academic journals: Quantitative Finance, Journal of Computational Finance.
Teaching methods	Lectures, projects, independent study,
Assessment methods	The evaluation procedure includes a written exam at the end of the semester and written assignments. The written examination participates by 70% in the final grade and the written assignments by 30%. The final written exam consists of problems solved through Python programming in the lab. The evaluation language is English. The evaluation criteria are mentioned to the students during the first lecture and are accessible in the course summary posted in the E-class.
Language of instruction	English

Course title	Financial Technology (Fin Tech)
Course code	bm73224f bm73224p
Type of course	Elective
Level of course	Postgraduate
Year of study	1 st & 2 nd
Semester/trimester	2 nd & 4 th
Number of credits allocated	5
Name of lecturer	Sakkas Athanasios, Assistant Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	Upon successful completion of the course the student understands how, why and when financial institutions and other companies can benefit from the use of new technologies. He also understands the functioning of blockchain and its applications in the financial sector. He also understands the cryptocurrency ecosystem. He also gets knowledge on the operation of digital and alternative finance. Finally, he understands the regulatory framework of Financial Technology and appreciates the ethical issues that arise.
Prerequisites	NONE
Course contents	The aim of the course is to introduce students to the current developments in the field of Financial technology (Fin tech) and its important implications on the financial services industry, markets and global economy. The course analyses the context within which the application of blockchain, artificial intelligence, robo-advisory, and many other technological innovations create new business opportunities in the financial services industry. In addition, it provides a detailed insight into the challenges associated with the regulation and adoption of new technologies in the financial services. Topics 1. Introduction to Fintech

	<p>2. PayTech.</p> <p>3. P2P Lending and Crowdfunding</p> <p>4. Robo-Advisors, InsurTech και RegTech</p> <p>5. Blockchain and applications</p> <p>6: The ecosystem of cryptoassets: Bitcoin, Altcoins, Stablecoins, Central Bank Digital Currency</p> <p>7: ICOs, Centralized και Decentralized Exchanges and Valuation of cryptoassets</p> <p>8: Legal dimensions of Fintech and the future of the financial ecosystem</p>

Teaching methods	Lectures, Coursework
Assessment methods	Written exam in the English language with short-answer questions and open-ended questions and evaluation of the coursework
Language of instruction	English

Course title	Auditing and Fraud Detection with Analytics
Course code	bm73225f bm73225p
Type of course	Elective
Level of course	Postgraduate
Year of study	1 st
Semester/trimester	2 nd
Number of credits allocated	5
Name of lecturer	Demoirakos Efthymios, Assistant Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	<p>Upon successful completion of the course, participants will be able to acquire knowledge with respect to the following topics:</p> <ul style="list-style-type: none"> - Introduction to External Auditing and Fraud Examination - Asset Misappropriation I: Skimming and Cash Larceny - Asset Misappropriation II: Billing, Payroll and Expense Reimbursement Schemes - Asset Misappropriation III: Register Disbursement, Non-Cash Asset Misappropriation, and Check Tampering Schemes

	<ul style="list-style-type: none"> - Corruption Schemes - Financial Statement Fraud Schemes - Practical issues relating to audit software programs and financial databases.
Prerequisites	NONE
Course contents	The primary purpose of the course is to familiarize students with the various occupational fraud schemes. For each fraud method, students solve case studies, and examine the preventive and detective controls that the firm's management may adopt to deal with it. The students learn how to use audit software programs and implement sophisticated earnings manipulation detection techniques by using financial databases.
Recommended reading	Required Reading: Wells, J. (2017). "Corporate Fraud Handbook", Hoboken: Wiley. Further Reading: ACFE Material, Research Studies, Practice-oriented Articles, Case Studies
Teaching methods	Lectures/Laboratory Exercises
Assessment methods	The methods of student assessment include a three-hour written examination (comprising multiple choice questions and case studies) [70%], a group project [10%], and laboratory work [20%].
Language of instruction	English

Course title	Data Management & Cyber Security
Course code	bm73226f bm73226p
Type of course	Elective
Level of course	Postgraduate
Year of study	1 st and 2 nd
Semester/trimester	2 nd and 4 th
Number of credits allocated	5
Name of lecturer	Siougle Georgia, Professor, Dept of Accounting and Finance
Objective of the course (preferably expressed in terms of learning outcomes and competences)	The purpose of this course is to introduce basic data protection principles and data security management and policies for a business entity. Cyber security issues and personal data security issues both for the business entity itself along with third party data maintained by the entity are discussed
Prerequisites	NONE
Course contents	Students will be familiarized with the basic concepts of data protection and security management
Recommended reading	Students are provided with lecture slides, case studies, research articles. All this material is available on the eclass platform
Teaching methods	Lectures
Assessment methods	Written Exams 80 % Compulsory assignment 20 %
Language of instruction	English

PART III: STUDENT INFORMATION

GENERAL STUDENT INFORMATION

The Athens University of Economics and Business provides not only high-quality education but also high-quality student services. The adoption of the Presidential Decree 387/83 and Law 1404/83 defines the operation, organization, and administration of Student Clubs at Universities, which aim at improving the living conditions of the students and enhance their social and intellectual wellbeing through engagement and socialization initiatives.

To fulfill this objective the University ensures the required infrastructure for housing, meals, and sports activities through the operation of a student restaurant, reading rooms, library, organization of lectures, concerts, theatrical performances, and excursions in Greece and abroad. Further in this context, the University supports the development of international student relations, organizes foreign language classes, computer/software literacy classes, and courses in modern Greek as a foreign language for foreign students and expatriated Greek students.

Detailed information on meals, housing, fitness, foreign languages, cultural activities, scholarships, financial aid, is provided on the website of AUEB's Student Club at <https://lesxi.aueb.gr/>

Electronic Services

A significant number of procedures related to both attendance and student care are carried out electronically through applications of the University or the Ministry of Education and Religious Affairs. All applications are accessible with the same codes (username & password).

- **E-mail account:**

Detailed instructions for using the Webmail Service are provided at <https://www.aueb.gr/el/content/webmail-manual>

- **Electronic Secretariat (Student Register)**

The Electronic Secretariat application is the information system through which students can be served by the Department's Secretariat via the web.

- **Wireless network**

Using their personal codes, students have access to a wireless network in all areas of the Athens University of Economics and Business buildings/campus.

- **E-Learning Platform – ECLASS**

The Open eClass platform is an integrated Electronic Course Management System and is the proposal of the Academic Internet (GUnet) to support Asynchronous Distance Education Services.

Instructions are provided at <https://eclass.aueb.gr/info/manual.php>

Medical Services, Insurance / Healthcare

Undergraduate, postgraduate and PhD students at the University who have no other medical and hospital care are entitled to full medical and hospital care in the National Health System with coverage of the relevant costs by the National Health Service Provider. A psychiatric counseling service also operates at the University, staffed with a physician specializing in the treatment of mental health issues. More information at <https://www.aueb.gr/en/content/health-care> .

Services/Facilities to Students with Special Needs

The Athens University of Economics and Business ensures the facilitation of students with special needs, through the design, implementation, and environmental adaptations, for access to the university building facilities. In the main building there are specially configured lifting machines, ramps, and elevators. There are also special regulations for conducting exams for students with special needs.

The Athens University of Economics and Business has established a Committee for Equal Access for people with disabilities and people with special educational needs. The Commission is an advisory body and submits recommendations to the competent bodies for the formulation and implementation of the policy of equal access for persons with disabilities and persons with special educational needs.

Through the Library services, students with physical disabilities are granted electronic access to the recommended Greek bibliography of the courses taught at the University. In this context, the Association of Greek Academic Libraries (SEAB) has developed a multimodal electronic library called AMELib.

More information is available at <https://www.aueb.gr/el/lib/content/amea-atoma-mediateires-anages>.

Academic Advisor

The Academic Advisor has the obligation to inform, discuss and advice students regarding the structure and curriculum of the program, the option of attending scientific seminars and lab sessions in order to optimize performance in the program's examinations, the syllabi and outlines of the elective courses, the job placement opportunities and available liaisons with the labor markets, or any other issue that may arise during their studies at the MSc program.

The MSc program in Financial Management has appointed the following academic advisors according to the stream of studies attended:

- Professor Apostolos Ballas – Financial Management Specialization
- Assistant Professor Leonidas Robolis – Financial Management Specialization
- Professor Georgia Siougle – Data Driven Financial Management Specialization
- Association Professor George Chalamandaris – Data Driven Financial Management Specialization

Library and Study Rooms

The Library & Information Center of the University operates at the University's main building. The AUEB Library is a member of the Hellenic Academic Libraries Association (Heal-LINK), the European Documentation Centers Europe Direct and the Economic Libraries Cooperation Network (DIOBI).

Three Documentation Centers operate within the library:

- The European Documentation Center
- The Organization for Economic Cooperation and Development (OECD) Documentation Center
- The Delegation Center of the World Tourism Organization (WHO)

The library contributes substantially both to meeting the needs for scientific information of the academic community and to supporting studying and research. The library provides access to:

- printed collection of books and scientific journals,
- course books used in modules,
- collection of electronic scientific journals& books
- postgraduate theses and doctoral theses that are produced in Athens University of Economics and Business and deposited in digital form at the PYXIDA institutional repository
- sectoral studies
- statistical series by national and international organizations
- audiovisual material
- information material (encyclopedias, dictionaries)
- databases on the topics used by the University
- printed collections of other academic libraries

The library lends all its printed collections, except for magazines and statistical series, in accordance with its internal rules of operation. The Library and Information Center offers reading rooms, computer workstations for visitors, photocopiers and printing machines, and interlibrary loan of books and journal articles from other academic libraries that are members of its network. More information at <https://www.aueb.gr/en/library> .

International Programs and Information on International Student Mobility

Athens University of Economics and Business is actively involved in the Erasmus+ Program since 1987 promoting cooperation with universities, businesses, and international organizations of the European Union (EU) as well as in the mobility of students, teaching, and administrative staff.

In addition, strengthening its internationalization objectives, it creates new opportunities through the Erasmus+ International Mobility Program. Within this framework, mobility scholarships are granted through the State Scholarships Foundation (SSF) to incoming and outgoing students of the three study cycles, according to the funding approved each year by the State Scholarship Foundation for the University. Outgoing students have the possibility to spend a period of study at a Partner Institution outside the EU with full academic recognition through the application of the ECTS credits system <https://www.aueb.gr/en/content/erasmus-programme>

Connecting with the Job Market and Entrepreneurship

D.A.STA.O.P.A. (<https://www.aueb.gr/el/dasta>) is the administrative unit of the University that plans, coordinates and implements the actions of the Athens University of Economics and Business in the following areas:

- a) development of entrepreneurship and innovation
- b) connecting students and graduates with the labor market
- c) connecting the academic community with businesses
- d) student internship programs and,
- e) supporting research utilization actions

Student Associations

Various student clubs and associations are active within the community of the Athens University of Economics and Business (<https://www.aueb.gr/el/content/student-associations>).

Alumni Network

Adhering to a long tradition of educating future top executives in the economic, social, and political life of the country, AUEB is proud that thousands of its graduates hold leading positions in companies, organizations, research institutes and universities in Greece and abroad. Understanding the importance of developing and strengthening the bond with its graduates, AUEB created its Alumni network including a platform <https://alumni.aueb.gr> where all graduates of the University can register. The main objectives of the Network are the connection of the graduates with their colleagues and former fellow students, and diffusion of information about activities, services, and events in and around the University that concern them. Additional information on Clubs and Alumni Associations is available on the website <https://www.aueb.gr/el/content/organizations-and-associations-of-students-and-alumni>

Volunteer Program

Within the framework of its strategies, the "AUEB Volunteers" Volunteering Program was launched in September 2017. The aim of the Program is to highlight important social issues and the value of participation and practical contribution, but also to raise community awareness regarding the 17 UN Sustainable Development Goals. Actions are developed around two pillars: (a) actions addressed to AUEB's Community, which have as their main objective the maintenance of the quality of the University's infrastructure based on their aesthetics and functionality, and (b) actions addressed to Greek society. (<https://auebvolunteers.gr/>).

Quality Assurance

The Athens University of Economics & Business implements a quality assurance policy to continuously improve the quality of its study programs, research activities and administrative services, and upgrade the academic and administrative processes and the University's operations. The Quality Assurance Unit (MODIP) operating at AUEB coordinates and supports evaluation processes. Particularly the quality assurance of the educational process is achieved using the module/teaching evaluation questionnaire completed by AUEB students. (<https://aueb.gr/modip>).

Training and Lifelong Learning Center

The Center for Training and Lifelong Learning (**KEDIVIM**) is an AUEB unit which ensures the coordination and interdisciplinary cooperation in the development of training programs, continuing education, training and in general lifelong learning, which complement, modernize and/or upgrade knowledge, competences, and skills, acquired from formal education,

vocational education and initial vocational training systems or from work experience, facilitating integration or reintegration in the labor market, job security and professional and personal development. (<https://www.aeb.gr/el/content/dia-vioy-mathisi-kedivim-opa>).
